Creation of conceptual and functional diagrams of Buy Way back-end.

Development of one-shot cobol project that creates ban codes for Buy Way clients.

Analysis and development of cobol project decrypting system's security messages. Database design in Access and VBA to develop a project managing the employees timesheet

Technologies: Mainframe, Cobol, UML, MS Office (Access, Excel), VBA, Scrum.

Entrepreneurship

Skygate SPRL - Co-owner

Since October 2015, I am Skygate co-owner. I created an IT branch in Skygate, and provided IT services for several clients.

Antartica LTD - Co-founder

Antartica is the project of two Brussels young entrepreneurs. Our aim is to give a concrete application to the most recent technologies in businesses and individuals everyday life, in the field of image projection. In order to do so, we have developed several services in 360°, live videos, community management, virtual reality and 3D drawings fields.
